Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This communication is responsive to the Appeal Brief filed August 9, 2006.

In view of the Appeal Brief filed on August 9, 2006, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 14 is rejected under 35 U.S.C. 102(e(2)) as being anticipated by Vukovich et al. ('228).

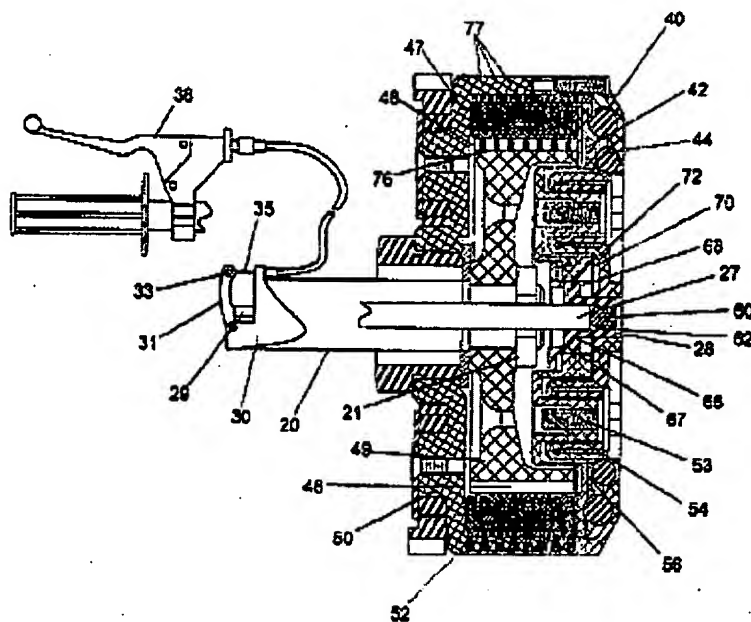

Vukovich et al. discloses a method for controlling a centrifugal clutch assembly comprising the steps of monitoring inputs, outputs, throttle and/or engine speed (184, Col. 11, lines 42-46), detecting a fault condition (e.g., a vehicle stop), disengaging the transmission of clutch (Col. 5, lines 39-47).

Claims 22-24 and 27-28 are rejected under 35 U.S.C. 102(e(2)) as being anticipated by Drussel et al. ('446).

Drussel et al. discloses a method of controlling/overriding a centrifugal clutch (Fig. 2) comprising the steps of moving a pressure plate (56) responsive to the radial movement of weights (40, 44), engaging at least one friction plate (77), overriding the

Art Unit: 3681

engagement (31, 33, 36), moving the pressure plate with a sleeve (64), and means for engaging the clutch below a threshold speed (Col. 3, lines 18-28).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16, 18, 19 and 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vukovich et al. ('228) in view of Drussel et al. ('446).

Vikovich et al. does not disclose the specific of the clutch having radially moving weights, a pressure plate, etc.

Drussel et al. disclose an overridable clutch comprising the structure outlined above.

Then, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to use the clutch of Drussel in the control assembly of Vukovich to provide a compact and reliable assembly for achieving the objects of the base reference.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Brown et al. ('837) discloses a centrifugal clutch with electromagnetic release/override.

Steeby ('082) discloses an engine control device for controlling the torque through a clutch assembly.
